Indes Collection 2017 – so beautiful!

Flowery, colorful and full of life, the Indes Fuggerhaus collection presents itself "so beautiful!" in strong colors, making just a difference. And if you like it more relaxed, decorate your windows in calmly coloured patterns.

Who does not like to remember the feeling of warm summer days - enjoy a picnic on the green with friends and family, framed by colorful flowers, blue skies, a light breeze accompanied by a song of a bird and the fresh air. With the decoration fabric "Weekend" , you can easily bring relaxed summer days home with you.

Or you lose yourself in an imagination with Indes fabric "Daydream" - because gentle watercolor drawings in delicate shades blur here to a harmonious foliage artwork. Whether as a decoration fabric or semi-transparent inbetween - with "Daydream" you can leave the everyday life behind and simply relax.

If you like subdued clarity, the „so beautiful!“ collection guarantees clear forms, simple color gradients and fine color combination recognition. Straightforward and at the same time enriched with an individual handwriting, our fabrics bring movement to your window.

The collection includes 13 items on 10 sample hangers with the fresh and trendy combination yellow-green-orange and other color highlights.
